

I-49 North Corridor Alternate Routes

Map Key

- Interstate
- Purple Route
- Exit Number

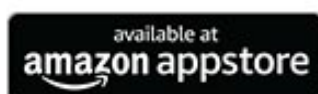

The Arkansas Department of Transportation has developed this map to illustrate linkages between the Interstate and secondary highways in this corridor. These alternate routes are designed to help motorists safely navigate around traffic delays caused by work zones and incidents.

TRAVELER INFORMATION

Trucks should plan alternate routes carefully, taking note of any weight or other types of restrictions.

All motorists are encouraged to check the live traffic feature on IDRIVEARKANSAS.COM to determine if traffic delays are occurring on the desired alternate route as well. Alternate routes are not recommended during winter weather events.

Note: Route colors only illustrate separate alternate routes and do not reflect the faster travel times.
